6. Please explain your rating above regarding academic integrity of AI use for this submission. Why? (Write in 2-3 sentences) \*

I'm always saying "somewhat acceptable" as long as people are using it as a learning purposes it should be okay. However, I don't think it's fair if they rely on AI for the project.

10. Please explain your rating above about AI's impact on your learning for this submission. (Write in 2-3 sentences) \* 

For this overall Milestone I think AI was very useful! I learnt a lot of new things when coding in React that I had never learnt before. Though I used videos to learn React and JavaScript often times I was also referring to AI to help me conceptualize ideas or even simply a reminder on how certain things were done.

11. List the name all the AI tools that you used for this submission \* 

ChatGPT

12. How confident were you in AI's responses that you received? \* 

- ☒ Confident
- ☐ Somewhat confident
- ☐ Neutral
- ☐ Somewhat not confident
- ☐ Not confident

13. How did you ensure the answer you received from the AI tool was correct? \* 

Since I used it as a reference to the videos I was watching I ensured that it was correct because as long as the AI's response was representative of the tutorials I was watching I was confident.

14. Did you at any point abandon using AI tools and seek other resources? Explain your answer. \*

What made you abandon using the AI tool? Were you more successful using other resources? Input N/A if you have not used any

Yes! There are concepts I cannot think of an example right now where I would ask AI how something is done. However, it would prompt up a full solution I would not understand during these cases I often will stir away from using it at all as I did not like to use anything if I did not understand it which is why I would go back to Tutorial sites or videos.

15. For each of the following items, how would you rate the relative contribution made by you versus AI? \*

from AI

AI

Evenly split  
between

16. Please explain your ratings above, especially if you have AI tools for "other" types of work. \* 

For Q&A + Research & Coding Explanation I often used it when learning React, Javascript, HTML & CSS since I spent that first month and a half trying to learn all of this to help my group out in the project. It was just often used again to reinforce my learning on making analogy of how certain things work if I don't grasp the content from the readings.

The rest I really wanted to challenge myself in this project to not use AI when it comes to implementing the project as I think being able to say that I was able to develop a website application with my peers is an achievement for this semester!
